

Meet the #1 Remote Monitoring System for Neurology Clinics

WHO WE ARE

Pioneers in Personalized Neurological Care

CareTuner is leading a revolution in digital neurological care. Our streamlined data-driven system allows clinics to provide proactive care that follows current AAN guidelines. We use technology to address the profound shortage in neurology specialists by up-scaling existing resources.

Revenue-generator for your clinic

Grow your revenues while offering quality care at scale – with 100% of care team time reimbursed.

Ongoing neurological care that pays

Provide continuous holistic, personalized medicine to your patients.

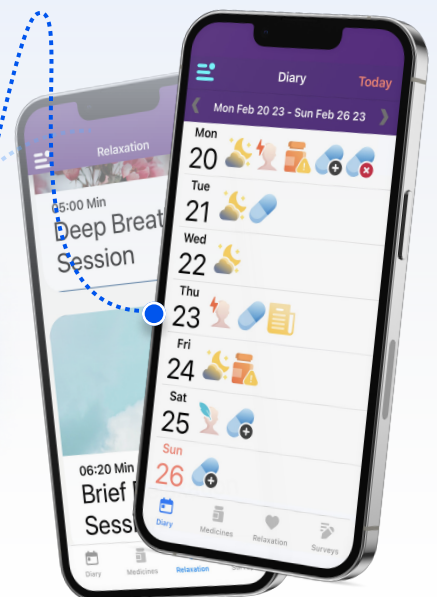

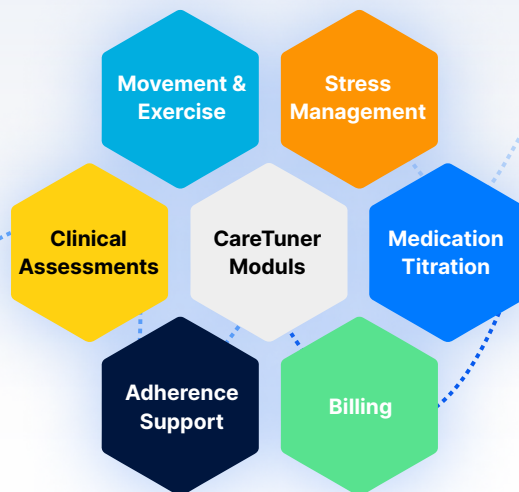

See more patients, more effectively

Use your resources more efficiently to increase patient flow, volume and quality of care

WHAT WE OFFER

A Cutting-Edge System, Leveraging Technology for Enhanced Collaborative Care

How we help you help your patients

CareTuner acts as a new member of your care team, at no cost to your clinic.

Increase revenue with ongoing remote monitoring and timely intervention for your patients.

Treat more patients with remote monitoring & lifestyle management plans.

Improve patient QoL and clinical outcomes – with care fine-tuned to each patient's lifestyle.

Improve efficiency of patient visits with 365/24/7 patient data management system.

Quick & easy onboarding for your care team.

CareTuner offers tools to help with reimbursement.

What users are saying...

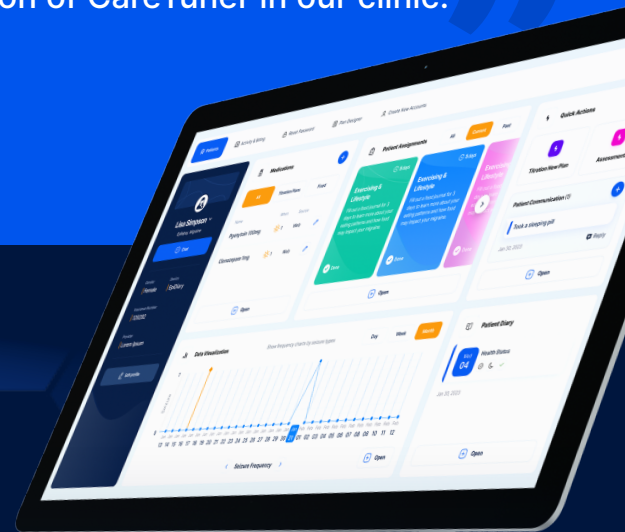

CareTuner is now an invaluable part of our standard care process. It has helped increase our patient inflow and physician productivity by ~10%. We can now provide care to a wider circle of patients, thanks to the successful implementation of CareTuner in our clinic.

Prof. Nicola Maggio

Deputy Head, Department of Neurology,
Sheba Medical Center
